Training in the development and production of a scholarship at ARSUTORIA

A 10-day practical course was promoted at ARSUTORIA in Milan, between July 11 and 22, 2022, for 11 participants from Portugal, Italy, Spain and Romania.

The course included training in the development and production of a bag, as well as visits and seminars on the use of 3D software for bag design. The result of this experience was a bag developed by each of the participants.

The course included training in the development and production of a bag, as well as visits and workshops on the use of 3D software for the design of bags. The result of this experience was a bag developed by each of the participants.

By participating in this course, you will develop the skills and competencies necessary to define, carry out and evaluate all the activities required of a Leather Goods Technician.

See testimonies from participants here

After this course, you will be equipped with the basics of the entire leather goods manufacturing process from idea to finished product, including and understanding of the marketing process, and you will know how leather goods are designed, have knowledge of the organization, logistics and scheduling of a collection, how to perform technical tasks related to pattern making, how to understand the manufacturing process and quality requirements, and how to participate in the prototyping evaluation process.

Partners presented the project results in a final conference at Assomac - Italy, at 22nd of september

The event included in the Simac Tanning Tech.
